

Regular Call for Proposals Northern Research Fund (NRF) 2022

The [Northern Research Fund \(NRF\)](#) provides opportunities for research in the sciences, social sciences and humanities with emphasis on northern issues. The goal of this program is to enhance field research by professionals working out of the Churchill Northern Studies Centre (CNSC). The NRF is available to research projects that will lead to increased knowledge relevant to the people living in the North, particularly in the Churchill region. The NRF is a matching funds program, meaning the award takes the form of matching user- and vehicle-days (as available) for successful applicants, to offset the cost of accommodation at the CNSC. Researchers from all disciplines are encouraged to apply; priority for funding is given to new researchers and students. The NRF 2022, available through the application process, is anticipated to consist of **250 user days and 100 vehicle days**. For more information, including the application and program guidelines, please go to: www.churchillscience.ca.

The application deadline is February 15, 2022.

Successful recipients will be required to recognize the supplemental funding on publicly displayed materials and provide an NRF research report at the end of the annual funding cycle.

Information about Funding Institutions

The goal of the Northern Research Fund (NRF) is to enhance research conducted by researchers using the facilities and services of the Churchill Northern Studies Centre (CNSC). The fund is available to assist researchers in meeting the financial needs of projects that will lead to increased knowledge relevant to the people living in the North, particularly in the region around Churchill. The CNSC appreciates the long-term financial support of Manitoba Conservation for this program.
